

Solución Fisiológica **VITULIA**

Unidose

INDICATIONS:

VITULIA physiological solution is recommended for washing out the nostrils and daily eyewashes, ocular and nasal hygiene for babies, children and adults

Nasal use: Vitulia Physiological Solution facilitates cleaning the noses of babies, which frequently obstructed by mucus. Encourages elimination of excessive secretions. Thanks to its moistening action, it quickly cures resolves nasal dryness in adults.

Ophthalmic use: Vitulia Physiological Solution can be used for babies' ocular hygiene by instillation, eyebaths or application with a sterile gauze. The physiological solution can be used by adults or children.

COMPOSITION:

Sodium chloride: 0.9 g, Purified water csp 100 ml.

OBSERVATIONS:

VITULIA physiological solution can be used as often as necessary, over long periods of time, without any risk at all.

When used in conjunction with medicines applied via the eyes or nose, the physiological solution must be used before, never after, the other product.

METHOD OF USE:

Separate a unidose pack and open by turning the top.

Nasal use: Introduce the cannula of the unidose pack into the nostril, with the head slightly inclined, and squeeze the pack gently. Afterwards, blow your nose, or use a nasal aspirator for babies.

Ophthalmic use: Soak a piece of cotton and gently clean the baby's eyelids, or direct a few drops into the eye and clean with a sterile gauze. In newborns, instil the product with the minimum of pressure, in order to avoid the risk of contaminating the inner ear.

In adults, the product can be used as a rinse, an instillation or an eyebath.

PRECAUTIONS OF USE:

One use only.

Not for injection.

Keep out of the reach of children.

Do not use after expiry date.

Do not use the same unidose pack for nasal and eye hygiene.

Store at room temperature.

The unidose packs must not be reused, as the product does not contain preservatives.
